HERNANDO COUNTY TECHNICAL APPENDIX

Zip Code Tabulation Area (ZCTA) _____	89
Uninsured _____	96
Unemployment _____	100
Businesses _____	101
Education _____	104
High School Graduation and Dropout Rates _____	104
Level of School Completed _____	104
Language Spoken _____	106
Free and Reduced Lunch _____	107
Food Stamps and Temporary Assistance for Needy Families (TANF) _____	108
WIC Eligibles _____	110
Mortality _____	112
Age Adjusted Death Rates for Top Causes of Deaths _____	116
Causes by Race _____	116
Causes by Ethnicity _____	134
Causes by Gender _____	137
By Zip Code Level _____	143
Suicide Deaths _____	156
Causes of Infant Death's _____	158
0 – 17 Years of Age Causes of Death _____	161
18 – 44 Years of Age Causes of Death _____	162
45 – 64 Years of Age Causes of Death _____	163
65+ Years of Age Causes of Death _____	164
Years of Potential Life Lost _____	165
Mental Health _____	168
Hospitalizations and Emergency Department (ED) Visits _____	168
Baker Acts _____	174
Substance Abuse _____	177
Opioid Use _____	179
Domestic Violence _____	181
Maternal and Infant Health _____	182
County and Zip Code Level _____	182

OFFICIAL 2010 CENSUS COUNTS

The Following tables are the official counts of the United States Census Bureau.

The United States Census Bureau collects data by United States Postal Service (USPS) zip codes. Based on zip code data the Census Bureau then aggregates Zip Code Tabulation Area (ZCTAs) from addresses contained within each block. This allows the aggregated data to be converted into areal feature datasets (ZCTAs). For complete information, please see <http://www.census.gov/geo/reference/zctas.html>.

Florida	18,801,310	421,709	2.2

The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized by the Census: (1) the institutionalized population and (2) the noninstitutionalized population. The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration; such as correctional institutions, nursing homes and juvenile institutions. The noninstitutionalized population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters. Source: US Census Bureau, 2010 Census, Table QTP13.

A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have a direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

Hernando County	179,144	2,111	1.2
Florida	20,278,447	430,649	2.1

The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized by the Census: (1) the institutionalized population and (2) the noninstitutionalized population. The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration; such as correctional institutions, nursing homes and juvenile institutions. The noninstitutionalized population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters.

Although the American Community Survey(ACS) produces population, demographic and housing unit estimates for 2013-2017, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

NA = Data not available to calculate this number.

A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

Although the American Community Survey(ACS) produces population, demographic and housing unit estimates for 2013-2017, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have a direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

Although the American Community Survey(ACS) produces population, demographic and housing unit estimates for 2013-2017, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

* A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

Although the American Community Survey(ACS) produces population, demographic and housing unit estimates for 2013-2017, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

* The estimated number of population 5+ that speak other languages was calculated at the top of the current table.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates for 2013-2017, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

AR = All Races, WR=White Races, BR=Black Races, H=Hispanics, F=Females, M=Males.

* The ranking of the causes of deaths in the table are based on the total number of deaths for Hernando County by each race and ethnicity for the time period of 2014-2018. Causes of deaths are shown for the top 10 by each race and for ethnicity as well as where they rank if they are in one of the top 10 by race or ethnicity.

If there is a "t" after the number the total number of deaths tied for those diseases.

The shorter names of the causes of deaths in ()'s above will be used in the rest of the tables in the appendix for the name for that particular cause of death.

BEHAVIORAL RISK FACTORS SURVEILLANCE SURVEYS (BRFSS)

TABLE 136. COMPARISON OF SELECTED BRFSS INDICATORS FOR HERNANDO COUNTY AND FLORIDA, 2016.

Indicator	Hernando County	Florida
Health Status Indicators		
Arthritis		
Percentage of adults who have been told they have some form of arthritis, rheumatoid arthritis, gout, lupus or fibromyalgia	32.1	24.8
Asthma		
Percentage of adults who currently have asthma	7.0	6.7
Percentage of adults who have ever had asthma	11.4	11.0
Cancer Prevalence		
Percentage of adults who have ever been told they had skin cancer	9.0	9.1
Percentage of adults who have ever had any other type of cancer except skin cancer	9.7	7.5
Cardiovascular Disease		
Percentage of adults who have ever had a stroke	7.0	3.5
Percentage of adults who have ever had a heart attack, angina or coronary heart disease, or stroke	18.3	9.8
Percentage of adults who have ever had angina or coronary heart disease	8.2	4.7
Percentage of adults who have ever had a heart attack	10.1	5.2
COPD		
Percent of adults who have chronic obstructive pulmonary disease, emphysema, or chronic bronchitis	10.1	7.1
Depression		
Percentage of Adults who have a depressive disorder	16.9	14.2
Diabetes		
Percentage of adults with diagnosed diabetes	15.0	11.8
Average age at which diabetes was diagnosed	51.0	48.2
Percentage of adults with pre-diabetes	89.2	9.4

**TABLE 136 CONT. COMPARISON OF SELECTED BRFS SURVEY INDICATORS FOR
HERNANDO COUNTY AND FLORIDA, 2016.**

Indicator	Hernando County	Florida
Health-Related Prevention Indicators Continued		
Cancer Screening/Colorectal		
Percentage of adults 50 years of age and older who received a blood stool test in the past year	29.9	16.0
Percentage of adults 50 years of age and older who have ever had a blood stool test	50.2	36.0
Percentage of adults 50 years of age and older who received a sigmoidoscopy or colonoscopy in the past five years	56.0	53.9
Percentage of adults 50 years of age and older who have ever had a sigmoidoscopy or colonoscopy	74.8	69.2
Percentage of adults aged 50 to 75 who had colorectal screening, based on the most recent clinical guidelines	77.7	67.3
HIV/AIDS		
Percentage of adults less than 65 years of age who have ever been tested for HIV	49.5	55.3
Percentage of adults less than 65 years of age who had an HIV test in the past 12 months	10.1	19.7
Percentage of adults who had ever been tested for HIV	38.9	46.9
Injury Prevention		
Percentage of adults 45 years of age and older who had a fall-related injury in the past 12 months	10.7	9.9
Percentage of adults who "always" or "nearly always" use a seatbelt when riding in a car	96.2	95.0
Immunization		
Percentage of adults who received a flu shot in the past year	35.9	35.0
Percentage of adults age 65 and older who received a flu shot in the past year	48.7	57.6
Percentage of adults who have ever received a pneumococcal vaccination	40.3	34.6
Percentage of adults age 65 and older who have ever received a pneumonia vaccination	62.5	65.6
Percentage of adults who have received a tetanus shot since 2005	54.0	52.9

TABLE 136 CONT. COMPARISON OF SELECTED BRFSS INDICATORS FOR HERNANDO COUNTY AND FLORIDA, 2016.

Indicator	Hernando County	Florida
Health-Related Quality of Life		
Percentage of adults who said their overall health was "fair" or "poor"	22.0	19.5
Percentage of adults with good to excellent overall health	78.0	80.5
Percentage of adults who had poor mental health on 14 or more of the past 30 days	14.4	11.4
Percentage of adults who had poor physical health on 14 or more of the past 30 days	17.9	12.9
Percentage of adults with good physical health for the past 30 days	82.1	87.1
Percentage of adults with good mental health for the past 30 days	85.6	88.6
Average number of days where poor mental or physical health interfered with activities of daily living in the past 30 days (Among adults who have had at least one day of poor mental or physical health)	7.8	5.7
Percentage of adults whose poor physical or mental health kept them from doing usual activities on 14 or more of the past 30 days	27.6	18.6
Average number of unhealthy physical days in the past 30 days	5.5	4.0
Average number of unhealthy mental days in the past 30 days	4.0	3.6
Health Care Access & Coverage		
Percentage of adults with any type of health care insurance coverage	85.3	83.7
Percentage of adults who have a personal doctor	79.1	72.0
Percentage of adults who could not see a doctor in the past year due to cost	17.6	16.6
Percentage of adults who had a medical checkup in the past year	79.8	76.5
Percentage of adults who have Medicare (Medicare is a coverage plan for people 65 or over and for certain disabled people).	48.8	37.9
Oral Health		
Percentage of adults who have seen a dentist in the past year	55.1	63.0
Percentage of adults who had a permanent tooth removed because of tooth decay or gum disease *	58.5	47.3

HIV AND AIDS CASES

TABLE 138. REPORTED HIV CASES AND AIDS CASES AND RATES PER 100,000 POPULATION, HERNANDO COUNTY AND FLORIDA, 2005-2014.

Year	HIV INFECTION CASES				AIDS INFECTION CASES			
	Hernando County		Florida		Hernando County		Florida	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
2006	11	6.7	5,665	31.1	6	3.7	4,216	23.1
2007	19	11.2	6,484	35.0	7	4.1	4,022	21.7
2008	14	8.2	6,058	32.5	8	4.7	4,148	22.3
2009	12	7.0	5,194	27.8	8	4.6	3,857	20.6
2010	13	7.5	4,712	25.0	4	2.3	3,155	16.8
2011	7	4.0	4,667	24.6	9	5.2	3,017	15.9
2012	7	4.0	4,492	23.5	9	5.2	2,846	14.9
2013	11	6.3	4,369	22.6	9	5.2	2,876	14.9
2014	10	5.7	4,599	23.5	3	1.7	2,175	11.1
2015	14	7.9	4,691	23.6	9	5.1	2,135	10.7
2016	16	8.9	4,805	23.8	10	5.5	2,116	10.5
2017	20	10.9	4,949	24.1	11	6.0	2,044	9.9

Please note that these data represent reported new cases of HIV. The increased number of cases for 2007 is partially attributable to changes in HIV case definitions for HIV reporting. Please note that many 2007 AIDS cases were not reported until 2008 because of the change from paper to electronic lab reporting (ELR). This results in an artificially low count of AIDS cases in 2007. HIV and AIDS cases by year of report are NOT mutually exclusive. They SHOULD NOT be added together.

HERNANDO COUNTY TECHNICAL APPENDIX

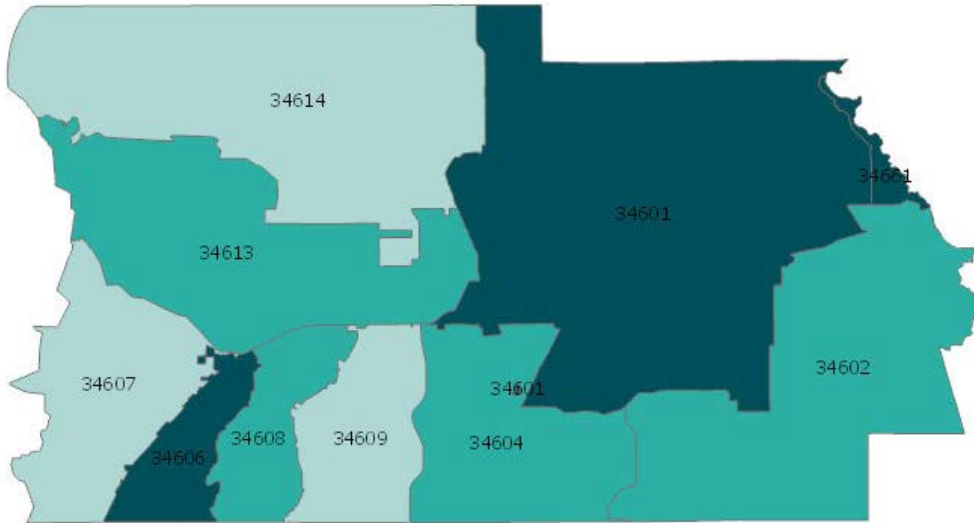

TABLE 157 CONT. TOTAL NUMBER OF DISCHARGES FOR THE TOP LEADING MS-DRGS PER YEAR, HERNANDO COUNTY AND FLORIDA, JANUARY 2015 - SEPTEMBER 2018. *

Medicare Severity Diagnosis-Related Group (MS-DRG)	Hernando County			Florida		
	Discharges	Percent of All Discharges	Percent of Total Discharges Without Normal Newborns	Discharges	Percent of All Discharges	Percent of Total Discharges Without Normal Newborns
Calendar Year 2017						
Psychoses (885)	1,710	5.5	5.6	131,076	5.0	5.2
Esophagitis, Gastroenteritis and Miscellaneous Digestive Disorders without MCC (392)	997	3.2	3.3	57,423	2.2	2.3
Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity without MCC (470)	957	3.1	3.1	71,928	2.8	2.9
Normal Newborn (795)	942	3.0	---	116,018	4.4	---
Septicemia or Severe Sepsis without Mechanical Ventilation > 96 Hours with MCC (871)	838	2.7	2.8	71,049	2.7	2.8
Vaginal Delivery without complicating Diagnoses (775)	739	2.4	2.4	108,076	4.1	4.3
Septicemia or Severe Sepsis without Mechanical Ventilation > 96 Hours without MCC (872)	586	1.9	1.9	30,319	1.2	1.2
Chest Pain (313)	494	1.6	1.6	20,461	0.8	0.8
Chronic Obstructive Pulmonary Disease with MCC (190)	440	1.4	1.4	32,154	1.2	1.3
Heart Failure and Shock with MCC or Peripheral Extracorporeal Membrane Oxgenation (ECMO) (291)	439	1.4	1.4	47,615	1.8	1.9
All Others	23,201	74.0	76.3	1,926,807	73.7	77.2
Total With Normal Newborns	31,343	100.0		2,612,926	100.0	
Total Without Normal Newborns	30,401		100.0	2,496,908		100.0
January - September 2018						
Psychoses (885)	1,353	5.4	5.6	106,261	5.2	5.4
Septicemia or Severe Sepsis without Mechanical Ventilation > 96 Hours with MCC (871)	823	3.3	3.4	62,919	3.1	3.2
Esophagitis, Gastroenteritis and Miscellaneous Digestive Disorders without MCC (392)	782	3.1	3.2	41,548	2.0	2.1
Major Hip and Knee Joint Replacement or Reattachment of Lower Extremity without MCC (470)	673	2.7	2.8	53,722	2.6	2.8
Normal Newborn (795)	665	2.7		87,677	4.3	
Vaginal Delivery without complicating Diagnoses (775)	599	2.4	2.5	82,116	4.0	4.2
Septicemia or Severe Sepsis without Mechanical Ventilation > 96 Hours without MCC (872)	523	2.1	2.2	26,793	1.3	1.4
Chest Pain (313)	421	1.7	1.7	14,819	0.7	0.8
Heart Failure and Shock with MCC or Peripheral Extracorporeal Membrane Oxgenation (ECMO) (291)	352	1.4	1.5	40,079	2.0	2.1
Kidney and Urinary Tract Infections without MCC (690)	315	1.3	1.3	23,644	1.2	1.2
All Others	18,348	73.8	75.9	1,498,911	73.5	76.8
Total With Normal Newborns	24,854	100.0		2,038,489	100.0	
Total Without Normal Newborns	24,189		100.0	1,950,812		100.0

Technical Notes

2010 U.S. CENSUS DATA

The 2010 U.S. Census data provides the official counts of the population and housing units for the nation, counties, cities and towns. In the past, short and long forms were sent out every ten years. Now, only the short forms are sent out every ten years. Information collected on the long forms in the past are now asked on the yearly American Community Surveys. 2010 Census data is shown for the population in various breakouts to show the official counts by Zip Code Tabulation Areas, county and state level.

AMERICAN COMMUNITY SURVEY DATA

The American Community Survey (ACS) data is released in one-year, or five-year estimates depending on what level of data is shown. Traditionally, short forms and long forms were sent out to addresses every 10 years. The American Community Survey was designed to replace the long form and it is now sent to only a sample of the population each year instead of every ten years, so that ongoing estimates may be available. The ACS reports contain estimates, not the official counts. The U.S. Census states that you should not compare 2010 Census numbers to ACS data; they also suggest that you only compare ACS data when the data are different sets of years. Therefore, to compare 2005-2009 ACS data you would not compare it with any other set until the 2010-2014 data is released. Three year estimates have been released in the past but are no longer being released. Individual sets of years of data for the ACS may be compared to each other. Please remember that the ACS data are not the actual count but a sample of the population over the selected time period. For more detailed information on the American Community Survey please refer to <https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data/2014.html>.

Since previous data that was collected on the old long forms were not collected during the 2010 official counts, there is no data from that point for education levels and income information in the 2010 counts. The income information and education data estimates are shown from the latest ACS. Various other data from the latest ACS are included in this report as well to show the latest estimates. To be able to compare Zip Code Tabulation Area level data, data from the five-year estimates has to be utilized.

AVAILABILITY OF SERVICES

To show various services that are available to persons in the county, rates are shown for the acute care hospital beds, nursing home beds, various types of doctors and dentists and dental services.

AVOIDABLE DISCHARGES/INPATIENT HOSPITALIZATIONS

Avoidable discharges are based on the ACS Conditions study done by John Billings. Only discharges for the less than 65 population are looked at. The codes are listed at http://wagner.nyu.edu/chpsr/acs_codes.pdf.

AVOIDABLE EMERGENCY DEPARTMENT (ED) VISITS

Avoidable emergency department visits are based on the NYU Algorithm. ED visits are classified into four categories based on the NYU Algorithm: (1) Non Emergent, (2) Emergent/Primary Care Treatable, (3) Emergent/Emergency Department Care Required But Preventable/Avoidable and (4) Emergent/Emergency

Department Care Required Not Preventable/Avoidable. Therefore the first three categories were combined to create the total number of Avoidable ED Visits. This data is based on all ED visits no matter what the age of the patient.

BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM (BRFSS) DATA

The Florida Department of Health conducts the Behavioral Risk Factor Surveillance System (BRFSS) with financial and technical assistance from the Centers for Disease Control and Prevention (CDC). This state based telephone surveillance system collects self-reported data on individual risk behaviors and preventive health practices related to the leading causes of morbidity and mortality in the United States. BRFSS indicators are summarized only at the state and County level.

BIRTHS

Various birth, infant deaths are shown for the maternal and child data. Data by race is shown for comparison. Low birthweight births, very low birthweight births are shown as well as teen birth rates and repeat birth rates. Trimester of care services and when they were started are also shown for comparison. Payor sources for the deliveries are shown as well. Data is shown when available as well by zip code levels. Rates are mostly based on per 1,000 live births unless stated as a percent of total births or per a certain stated population.

BUSINESSES

Data for business sizes and selected types are shown from the latest County Business Patterns produced from the U.S. Census Bureau.

COUNTY HEALTH RANKINGS

The County Health Rankings are a key component of the Mobilizing Action Toward Community Health (MATCH) collaboration project between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. Counties receive a rank relative to the health of other counties in the state. Counties having high ranks, e.g. 1 or 2, are considered to be the “healthiest”. Health is viewed as a multi-factorial construct. Counties are ranked relative to the health of other counties in the same state on the following summary measures:

- I. Health Outcomes--rankings are based on an equal weighting of one length of life (mortality) measure and four quality of life (morbidity) measures.
- II. Health Factors--rankings are based on weighted scores of four types of factors:
 - a. Health Behaviors (9 measures)
 - b. Clinical Care (7 measures)
 - c. Social and Economic (8 measures)
 - d. Physical Environment (5 measures)

For more detailed information please check <http://www.countyhealthrankings.org/ranking-methods>.

CRUDE VERSUS AGE-ADJUSTED MORTALITY RATES

Both the crude and the age-adjusted death rates (AADR) are displayed in this report. Crude rates are merely the actual number of deaths for a given cause for a desired population divided by total number in the desired population and then multiplied by 100,000 to get the rate per 100,000 population, while AADR represent crude rates adjusted to standardize the population distribution effects on the rate.

Although useful for certain purposes, the crude death rate as a comparative measure has a major shortcoming. It is a function of the age distribution of the population at risk. For example, the population at risk in one County may be primarily elderly persons ages 65 and older while the population at risk in another County may be primarily of persons ages 40 to 50. Crude rates are recommended when a summary measure is needed and it is not necessary or desirable to adjust for other factors.

The frequency with which health events occur is almost always related to age. In fact, the relationship of age to risk often dwarfs other important risk factors. For example, acute respiratory infections are more common in children of school age because of their immunologic susceptibility and exposure to other children in schools. Chronic conditions, such as arthritis and atherosclerosis, occur more frequently in older adults because of a variety of physiologic consequences of aging. Mortality rates tend to increase after the age of 40.

Because the occurrence of many health conditions is related to age, the most common adjustment for public health data is age adjustment. The age-adjustment process removes differences in the age composition of two or more populations to allow comparisons between these populations independent of their age structure.

The age-adjusted death rate is a summary measure that eliminates the effect of the underlying Age distribution of the population. The result is a figure that represents the theoretical risk of mortality for a population, if the population had an age distribution identical to that of a standard population. For example, a county's age-adjusted death rate is the weighted average of the age-specific death rates observed in that county, with the weights derived from the age distribution in an external population standard, such as the U.S. Population.

Age-adjustment then allows for the comparison of two distinct populations (for example, Hamilton County versus Florida) which most likely have differing age distributions. The age effects are in essence removed from the rates and the age-adjusted death rate then no longer reflects the actual death rate but is an indicator rate that can be used for relative comparisons.

In the past, the National Center for Health Statistics (NCHS) age-adjusted rates using the US 1940 standard population. Other agencies used the U.S. 1970 Standard. Beginning with 1999 data, federal agencies began age-adjusting to the U.S. 2000 Standard Million Population.

Zip Code level crude and age-adjusted rates are shown in a separate tables and the county rates and Florida rates are shown as well. These data should not be compared to tables that have only county and Florida rates in them. Population sources are different and these rates should not be compared.

EDUCATION LEVELS AND LANGUAGE SPOKEN AT HOME

The number of persons by level of school completed is shown as well as the language spoken in the home and how well English is spoken.

EMERGENCY DEPARTMENT (ED) DATA

For tables with emergency department data please note that this data only includes emergency department visits in which emergency department registration occurs and the patient is not admitted for inpatient care at the reporting entity.

ENVIRONMENTAL HEALTH

Water Supply and fluoridation data is show for environmental issues. Various access to healthy food data is included in the report. Recreation and fitness facility data is also included.

HEALTH PROFESSIONAL SHORTAGE AREAS (HPSA) DATA

HPSAs may be designated as having a shortage of primary medical care, dental or mental health providers. They may be based on geography, population or facility-based. Possible types of HPSA Designations in the area include.

Geographic Area – Where an entire population within a defined geographic area a defined is designated as a HPSA because of a shortage of providers.

Population Group - Where a specific population within a defined geographic area, such as loc income, migrant workers and other groups, is designated as a HPSA due to a shortage of providers.

Facilities - Different types of facilities, such as Correctional Institutions, State Mental Hospitals, Automatic Facility HPSAs, Federally Qualified Health Centers (FQHCs), FQHC Look-A-Likes(LALs), Indian Health Facilities, HIS and Tribal Hospitals, Dual-Funded Community Health Centers/Tribal Clinics and CMS-Certified Rural Health Clinics(RHCs) can all be designated as a HPSA because of a shortage of providers.

HPSA Scores are developed for use by the National Health Service Corps in determining priorities for assignment of clinicians. Scores range from 1 to 25 for primary care And Mental Health, 1 to 26 for dental health. The higher the score, the greater the priority. All Federally Qualified Health Centers and those Rural Health Clinics that provide access to care regardless of one’s ability to pay, receive automatic facility HPSA designation. These facilities may have a HPSA score of 0.

Source. <https://bhw.hrsa.gov/shortage-designation/hpsas>

HOUSEHOLD TYPES

There are various types of households. A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have a direct access from the outside of the

building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone. For more detailed explanation please see http://www2.census.gov/programs-surveys/acs/tech_docs/subject_definitions/2014_ACSSubjectDefinitions.pdf

IMMUNIZATIONS

The number of kindergartners and seventh graders that have been immunized are reported.

INCOMES

Various income data is shown by zip codes and levels from the latest 5-year ACS estimates.

INFECTIOUS DISEASES

Rates for gonorrhea, chlamydia and infectious syphilis, HIV and AIDS cases are shown as well as rates for vaccine preventable diseases.

INPATIENT HOSPITALIZATIONS

A general overview of discharges and patient days are shown by Zip Code level. Payor sources for these discharges are also shown for the county residents. The top leading MSDRGs are also shown for the County residents.

LICENSED HEALTH CARE FACILITIES AND PHYSICIANS

Various types of health care facilities that are available in the areas are listed. Dentists and various types of physicians are also listed.

MEDICALLY UNDERSERVED AREAS & POPULATIONS (MUAS & MUPS) DATA

MUAs may be a whole county or a group of contiguous counties, a group of county or civil divisions or a group of urban census tracts in which residents have a shortage of personal health services. MUPs may include groups of persons who face economic, cultural or linguistic barriers to health care.

Possible types of MUAs & MUPs Designations in the area include.

C = Whole County

T = Census Tract

MUAs and MUPs score is the Index of Medical Underservice (IMU) score. The lowest score (highest need) is 0; and the highest score (lowest need) is 100.

Source. <http://bhpr.hrsa.gov/shortage/muadatadict.htm>

MENTAL HEALTH

Hospitalizations and Emergency Department (ED) Visits are shown for mental health reasons. MSDRGs 876, 880-883, 885-887, 894-897 are used for hospitalizations. ICD 9 Codes 290-316.99 were used in determining mental health reasons to the emergency department. Involuntary Exam Initiations (Baker Act) data is shown as well for the mental health section. Domestic Violence data is also shown.

ORAL HEALTH

Hospitalizations and Emergency Department (ED) Visits are shown for oral health reasons. ICD 9 Codes 520-529 were used to pull the emergency department visits and the discharges due to oral health issues. All possible fields were used in categorizing these visits. The following ICD 9 Codes were used to categorize oral health as preventable: 520.5, 520.6, 520.7, 521.0, 521.1-521.8, 522.0, 522.1, 522.4-522.8, 523.0-523.9, 524.3-524.6, 525.1, 525.3, 525.9, 526.4, 526.5, 528.0-528.3, 528.5-528.7, 528.9 and 529.0.

POVERTY

The U.S. Census Bureau provides poverty estimates through the Small Area Income and Poverty Estimates (SAIPE). Data shown is for all ages in poverty as well as children under age 18. To compare poverty at the Zip Code level, the ACS estimates are shown for various age groups and various levels of poverty.

SMALL AREA HEALTH INSURANCE ESTIMATES

In previous Small Area Health Insurance Estimate (SAHIE) releases, uninsured was defined from the Annual Social And Economic Supplement to the Current Population Survey (CPS ASEC) and the question was for being covered "Some Time During the Past Calendar Year". With the 2008 release from the Census, the CPS ASEC data were replaced with American Community Survey (ACS) data. The ACS health insurance question asks, "Is this person CURRENTLY covered by [specifically stated] health insurance or health coverage plans?" In 2010, the age group 50-64 was added to the various age group breakouts in the SAHIE. The Census does not recommend comparing the 2008 and newer data to previous-year SAHIE estimates.

SUBSTANCE ABUSE DATA

When pulling data for the inpatient hospitalizations for substance abuse, MSDRGs 894, 895, 896 and 897 were pulled to collect this data. When pulling the substance abuse emergency department visits data, ICD 9 Codes 291, 292, 303, 304, 305, 306 and 790.3 were pulled from the principal diagnosis field only.

UNEMPLOYMENT

The latest unemployment monthly and yearly rates are shown for the county. This data is from the Florida Research and Economic Database.

ZCTAS AND ZIP CODES

The United States Census Bureau collects data by United States Postal Service (USPS) zip codes. Based on zip code data the Census Bureau then aggregates Zip Code Tabulation Area (ZCTAs) from addresses contained within each block. This allows the aggregated data to be converted into areal feature datasets (ZCTAs). For complete information, please see <http://www.census.gov/geo/reference/zctas.html>.

Below is a table that shows all zip codes in Hernando County along with the city name, percent of the zip code addresses in the county, whether or not the zip code is a post office box or a unique zip code and whether or not the post office box or unique zip code is included with another zip code's information. The ZCTA that the zip code is matched to is also listed. As you can see from the table most zip codes correspond to the same ZCTA number, the differences are post office or unique zip codes. There are two zip codes from surrounding counties that cross into Hernando County but are not shown because of the small percentage of addresses considered to be Hernando County. They are 33523 Dade City (Pasco County) which has approximately 17.3 percent of their zip code addresses in Hernando County. Webster (Pasco County) zip code 33597 has approximately 16.8 percent of their zip code addresses in Hernando County. Since zip codes can cross lines the tables include a Hernando County number as well as a total for the zip codes listed in the table.

Zip Code	Percent of addresses in Hernando County	Post Office Box	Included With Another Zip Code
34601 Brooksville	99.7	No	
34602 Brooksville	100.0	No	
34603 Brooksville	100.0	Yes	Will be combined with 34601
34604 Brooksville	100.0	No	
34605 Brooksville	100	Yes	Will be combined with 34601
34606 Spring Hill	100.0	No	
34607 Spring Hill	100.0	No	
34608 Spring Hill	100.0	No	
34609 Spring Hill	100.0	No	
34611 Spring Hill	100.0	Yes	Will be combined with 34606
34613 Brooksville	100.0	No	
34614 Brooksville	100.0	No	
34636 Istachatta	100.0	Yes	Will be combined with 34601
34661 Nobleton	100.0	No	
The following zip codes are partially located in Hernando County but are not considered a Hernando County Zip Code. Data for zip code addresses that are partially in Hernando County are not available and are not listed in the tables in this appendix.			
33523 Dade City (Pasco County)	17.3		
33597 Webster (Sumter County)	16.8
