## Demographics and Socioeconomics

Some zip codes in Bradford and Union County cross over county lines. Below is a figure with the zip codes that are in each county. The county designation shows which county the zip code belongs with. Only zip codes that are considered to be fully in Bradford or Union County has data displayed in the tables in the report. Graham zip code 32042 is a post office box and its point zip code is 32044 Hampton. There is some data available for zip code 32026 Raiford and that is listed in the tables. If data was not available for the zip code to calculate rates than the data was included with 32083 Raiford when calculating those rates and are noted in the tables.

**FIGURE 1. ZIP CODES IN BRADFORD AND UNION COUNTIES.**

Zip Code	Post Office Box	Percent of Zip Code in County	County Designation*
Bradford County Zip Codes			
32044 Hampton		95.4	Bradford
32042 Graham **	Yes	100	Bradford
32058 Lawtey		95.5	Bradford
32091 Starke		94.7	Bradford
32622 Brooker		81.7	Bradford
32054 Lake Butler		3.9	Union
32083 Raiford		4	Union
32656 Keystone Heights		16.1	Clay
32666 Melrose		17.8	Putnam
Union County			
32054 Lake Butler		96.1	Union
32026 Raiford ***	Yes	100	Union
32083 Raiford		96	Union
32697 Worthington Springs		100	Union
32058 Lawtey		3.9	Bradford

\* This is the main county that the zip code belongs with. If it is not one of the two counties (Bradford, Union) then information from those zip codes were not included in any of the tables.

\*\* 32042 Graham is included with 32044 Hampton.

\*\*\* 32026 Raiford is included with 32083 Raiford in some tables.

## COUNTY HEALTH RANKINGS

**TABLE 1. COUNTY HEALTH RANKINGS BY CATEGORY FOR BRADFORD AND UNION COUNTIES, 2010-2020.**

Area/Category	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Bradford County											
HEALTH OUTCOMES	53	44	49	60	59	56	61	61	62	64	64
<i>Mortality/Length of Life</i>	54	50	53	60	60	56	59	64	65	65	59

<i>Physical Environment</i>	9	44	37	64	51	28	21	11	10	15	12

PLEASE NOTE: DO NOT COMPARE 2016 RANKS FOR QUALITY OF LIFE AND HEALTH BEHAVIORS WITH PREVIOUS RANKS. In previous RWJ releases, the CDC provided BRFSS data with estimates based on seven years of combined data. 2016 Ranks, used only 2014 data to construct estimates. Historically, BRFSS was based on landline telephones. In 2011, cell-only users were included for the first time. RWJ said that the data from 2011 onward could not be easily combined with earlier years to create the RWJ county estimates. CDC doesn't release data when there are fewer than 50 responses, so in about 90 percent of the counties, in order to get more than 50, they would combine seven years of survey responses. CDC only provided 2014 county-by-county data to RWJ this year, using a different modeling technique so they could include cell phone data. The Health Rankings are a point in time ranking and really shouldn't be compared to other years due to changes in data sources, time frames and any other methodology changes.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates for 2014-2018, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized by the Census: (1) the institutionalized population and (2) the noninstitutionalized population. The institutionalized population includes people under formally authorized, supervised care or custody in institutions at the time of enumeration; such as correctional institutions, nursing homes and juvenile institutions. The noninstitutionalized population includes all people who live in group quarters other than institutions, such as college dormitories, military quarters, and group homes. Also, included are staff residing at institutional group quarters.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates for 2014-2018, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates for 2014-2018, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data. NA: Not Available.

A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have a direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates for 2014-2018, the 2010 Census provides the official counts of the population and housing units for the nation, counties, cities, and towns. The American Community Survey is a sample of data taken over a time period and should not be compared to other sources of data.

\* A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.

\* The ranking of the causes of deaths in the table are based on the total number of deaths for each county for the time period of 2015-2019 for each type of race. Causes of deaths are shown for the top 10 by each race and for ethnicity as well as where they rank if they are in one of the top 10 by race or ethnicity.

If there is a "T" after the number the total number of deaths tied for those diseases.

## Maternal and Infant Health

Various maternal and infant health data is presented at the zip code and county level for the current five-year time period. Data is broken out by race, Hispanics are not considered a race but a subset of the races. Therefore Hispanics should not be added in with the White and Black's to get a total. Not all races are shown in the table so the sum of these two may not equal what is shown in the total column.

### BIRTHS

## Health Behaviors

### BEHAVIORAL RISK FACTORS SURVEILLANCE SURVEYS (BRFSS)

**TABLE 97. SELECTED BRFSS INDICATORS BY COUNTY AND WHETHER OR NOT THE COUNTY IS WORSE THAN FLORIDA IN 2016.**

Indicator	Is Bradford County Worse Than Florida	Is Union County Worse Than Florida
Health Status Indicators		
Arthritis		
Percentage of adults who have been told they have some form of arthritis, rheumatoid arthritis, gout, lupus or fibromyalgia	Yes	Yes
Asthma		
Percentage of adults who currently have asthma	Yes	Yes
Percentage of adults who have ever had asthma	Yes	Yes
Cancer Prevalence		
Percentage of adults who have ever been told they had skin cancer	No	Yes
Percentage of adults who have ever been told they had any other type of cancer except skin cancer	Yes	Yes
Cardiovascular Disease		
Percentage of adults who have ever had a stroke	Yes	Yes
Percentage of adults who have ever had a heart attack, angina, or coronary heart disease, or stroke	Yes	Yes
Percentage of adults who have ever had angina or coronary heart disease	Yes	Yes
Percentage of adults who have ever had heart attack	Yes	Yes
COPD		
Percent of adults who have ever been told they had chronic obstructive pulmonary disease, emphysema, or chronic bronchitis	Yes	Yes
Depression		
Percentage of adults who have a depressive disorder	Yes	Yes

Health Status Indicators Continued		
Diabetes		
Percentage of adults with diagnosed diabetes	No	Yes
Average age at which diabetes was diagnosed	Yes	No
Percentage of adults with pre-diabetes	No	Yes
Disability		
Percentage of adults who are limited in any way in any activities because of physical, mental, or emotional problems	Yes	Yes
Percentage of adults who use special equipment because of a health problem	Yes	Yes
Kidney Disease		
Percentage of adults who have kidney disease	Yes	Yes
Overweight & Obesity		
Percentage of adults who are overweight	No	Yes
Percentage of adults who are obese	Yes	Yes
Percentage of adults who are overweight or obese	Yes	Yes
Percentage of adults who have a healthy weight	Yes	Yes
Vision Impairment		
Percentage of adults who are blind or have serious difficulty seeing, even when wearing glasses	Yes	Yes

Rural Health Clinic	Shands Medical Group of Starke	18	8/28/2019
Medically Underserved Area			
Medically Underserved Area	Bradford County	61.5	4/23/2019

\* The score represents the HPSA score developed for use by the National Health Service Corps (NHSC) in determining priorities for assignment of clinicians. The scores range from 0 to 26 where the higher the score the greater the priority.

\*\* Index of Medical Underservice Score (IMU), the lowest score (highest need) is 0, the highest score (lowest need) is 100. In order to qualify for designation, the IMU score must be less than or equal to 62.0, except for a Governor's designation, which does not receive an IMU score. The score applies to the MUA or the MUP as a whole and not just individual parts of it.

Florida	20,108,440	8,436,665	419.6	4,018,125	199.8

\* Avoidable ED Visits are classified into four categories using the NYU Algorithm: (1) Non Emergent, (2) Emergent/primary care treatable, (3) Emergent/emergency department care required but preventable/avoidable, (4) Emergent/emergency department care required, not preventable/avoidable. Therefore, the first three were combined to create the total number of avoidable ED visits.

## MAIN REASON FOR ED VISITS

**TABLE 120. NUMBER AND PERCENT OF THE MAIN REASON FOR EMERGENCY DEPARTMENT VISITS BY YEAR, BRADFORD AND UNION COUNTIES, JANUARY 2015 – JUNE 2019. \***

ICD 9 Code	Number	Percent
Bradford County - (January - September 2015) (N=12,348)		
Other symptoms involving abdomen and pelvis (789)	440	3.6
Cough (786.2)	414	3.4
Fever and other physiologic disturbances of temperature regulation (780.6)	376	3.0
Symptoms involving head and neck (784)	366	3.0
Union County - (January - September 2015) (N=6,199)		
Other symptoms involving abdomen and pelvis (789)	182	2.9
Symptoms involving head and neck (784)	155	2.5
Abdominal pain - Other specified site (789.09)	134	2.2
Acute upper respiratory infections of multiple or unspecified site (Unspecified Site) (465.9)	124	2.0
ICD 10 Code		
Bradford County - (October - December 2015) (N=4,046)		
Unspecified abdominal pain (R10.9)	181	4.5
Cough (R05)	178	4.4
Fever, unspecified (R50.9)	150	3.7
Headache (R51)	129	3.2
Union County - (October - December 2015) (N=1,994)		
Unspecified abdominal pain (R10.9)	66	3.3
Headache (R51)	44	2.2
Fever, unspecified (R50.9)	42	2.1
Chest Pain, unspecified (R07.9)	38	1.9

\* Please note that this data only includes emergency department visits in which emergency department registration occurs and the patient is not admitted for inpatient care at the reporting entity.

In October 2015, ICD-10 Codes were used instead of ICD-9 Codes. 2015 data is shown with the first three quarters of data combined and then the last quarter of the year is separate.

### Technical Notes

#### AMERICAN COMMUNITY SURVEY DATA

The American Community Survey (ACS) data is released in one-year, or five-year estimates depending on what level of data is shown. Traditionally, short forms and long forms were sent out to addresses every 10 years. The American Community Survey was designed to replace the long form and it is now sent to only a sample of the population each year instead of every ten years, so that ongoing estimates may be available. The ACS reports contain estimates, not the official counts. The U.S. Census states that you should not compare 2010 Census numbers to ACS data; they also suggest that you only compare ACS data when the data are different sets of years. Therefore, to compare 2005-2009 ACS data you would not compare it with any other set until the 2010-2014 data is released. Three year estimates have been released in the past but are no longer being released. Individual sets of years of data for the ACS may be compared to each other. Please remember that the ACS data are not the actual count but a sample of the population over the selected time period. For more detailed information on the American Community Survey please refer to <https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data/2014.html>.

Since previous data that was collected on the old long forms were not collected during the 2010 official counts, there is no data from that point for education levels and income information in the 2010 counts. The income information and education data estimates are shown from the latest ACS. Various other data from the latest ACS are included in this report as well to show the latest estimates. To be able to compare Zip Code Tabulation Area level data, data from the five-year estimates has to be utilized.

#### AVAILABILITY OF SERVICES

To show various services that are available to persons in the county, rates are shown for the acute care hospital beds, nursing home beds, various types of doctors and dentists and dental services.

#### AVOIDABLE DISCHARGES/INPATIENT HOSPITALIZATIONS

Avoidable discharges are based on the ACS Conditions study done by John Billings. Only discharges for the less than 65 population are looked at. The codes are below.

Condition/Reason	ICD 10 Codes Used to Identify
Congenital Syphilis	A50 (Secondary diagnosis for newborns only)
Immunization-related and preventable conditions	A33, A34, A35, A37, A80, G000, I01 (Hemophilus meningitis (G002) age 1-5 only)
Grand mal status and other epileptic convulsions	G40
Convulsions "A"	R56 Age 0-5
Convulsions "B"	R56 Age > 5
Severe ENT Infections	H66, J02, J03, J06, J312 (Exclude otitis media cases (H66, H67) with myringotomy with insertion of tube (C835))
Pulmonary Tuberculosis	A150, A155, A159
Other Tuberculosis	A154, A156, A158, A17, A18, A19
Chronic Obstructive Pulmonary Disease	J20, J40, J41, J42, J43, J44, J47 (Acute bronchitis (J209) only with secondary diagnosis of J41, J42, J43, J44, J47)
Bacterial Pneumonia	J13, J14, J153, J154, J157, J159, J16, J18 (Exclude case with secondary diagnosis of sickle cell (D57) and patients < 2 months)
Asthma	J45
Congestive Heart Failure	I50, I110, J810 (Exclude cases with a surgical procedure starting with 02)
Hypertension	I10, I119 (Exclude cases with a surgical procedure starting with 02)
Angina	I20, I240, I248, I249 (Exclude cases with a surgical procedure starting with 0 or 1)
Cellulitis	L30, L04, L08, L88, L980 (Exclude cases with a surgical procedure (starting with 0 or 1), except incision of skin and subcutaneous tissue (0H, 0J, 0W, 0X) where it is the only listed surgical procedure)
Skin Grafts with Cellulitis	MS DRG 573, 574, 575
Diabetes "A"	E101, E131, E110, E130, E10641, E11641 (Exclude admission from SNF/ICF)
Diabetes "B"	E106, E116, E108, E118
Diabetes "C"	E109, E119
Hypoglycemia	E162
Gastroenteritis	K529, K5289
Kidney/Urinary Infection	N10, N11, N12
Dehydration - Volume Depletion	E86 (Examine principal and secondary diagnoses separately)
Iron Deficiency Anemia	D501, D508, D509 (Age 0-5 only, and examine principal and secondary diagnoses separately)
Nutritional Deficiencies	E40, E41, E43, E550, E643 (Examine principal and secondary diagnoses separately)
Failure to Thrive	R6251, R6252, R620, R6250 (Age < 1 Only)
Pelvic Inflammatory Disease	N70, N73 (Women only - exclude cases with a surgical procedure of hysterectomy (OUT))
Dental Conditions	K04, K03, K04, K05, K060, K061, K062, K08, K12, K13, M276, A690, K098

## AVOIDABLE EMERGENCY DEPARTMENT (ED) VISITS

Avoidable emergency department visits are based on the NYU Algorithm. ED visits are classified into four categories based on the NYU Algorithm: (1) Non Emergent, (2) Emergent/Primary Care Treatable, (3) Emergent/Emergency Department Care Required But Preventable/Avoidable and (4) Emergent/Emergency Department Care Required Not Preventable/Avoidable. Therefore the first three categories were combined to create the total number of Avoidable ED Visits. This data is based on all ED visits no matter what the age of the patient.

## BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM (BRFSS) DATA

The Florida Department of Health conducts the Behavioral Risk Factor Surveillance System (BRFSS) with financial and technical assistance from the Centers for Disease Control and Prevention (CDC). This state based telephone surveillance system collects self-reported data on individual risk behaviors and preventive

health practices related to the leading causes of morbidity and mortality in the United States. BRFSS indicators are summarized only at the state and County level.

### BIRTHS

Various birth, infant deaths are shown for the maternal and child data. Data by race is shown for comparison. Low birthweight births, are also shown. Trimester of care services and when they were started are also shown for comparison. Payor sources for the deliveries are shown as well. Data is shown when available as well by zip code levels. Rates are mostly based on per 1,000 live births unless stated as a percent of total births or per a certain stated population.

### COUNTY HEALTH RANKINGS

The County Health Rankings are a key component of the Mobilizing Action Toward Community Health (MATCH) collaboration project between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. Counties receive a rank relative to the health of other counties in the state. Counties having high ranks, e.g. 1 or 2, are considered to be the “healthiest”. Health is viewed as a multifactorial construct. Counties are ranked relative to the health of other counties in the same state on the following summary measures:

- I. Health Outcomes--rankings are based on an equal weighting of one length of life (mortality) measure and four quality of life (morbidity) measures.
- II. Health Factors--rankings are based on weighted scores of four types of factors:
  - a. Health Behaviors (9 measures)
  - b. Clinical Care (7 measures)
  - c. Social and Economic (8 measures)
  - d. Physical Environment (5 measures)

For more detailed information please check <http://www.countyhealthrankings.org/ranking-methods>.

### CRUDE VERSUS AGE-ADJUSTED MORTALITY RATES

Both the crude and the age-adjusted death rates (AADR) are displayed in this report. Crude rates are merely the actual number of deaths for a given cause for a desired population divided by total number in the desired population and then multiplied by 100,000 to get the rate per 100,000 population, while AADR represent crude rates adjusted to standardize the population distribution effects on the rate.

Although useful for certain purposes, the crude death rate as a comparative measure has a major shortcoming. It is a function of the age distribution of the population at risk. For example, the population at risk in one county may be primarily elderly persons ages 65 and older while the population at risk in another county may be primarily of persons ages 40 to 50. Crude rates are recommended when a summary measure is needed and it is not necessary or desirable to adjust for other factors.

The frequency with which health events occur is almost always related to age. In fact, the relationship of age to risk often dwarfs other important risk factors. For example, acute respiratory infections are more common in children of school age because of their immunologic susceptibility and exposure to other children in schools. Chronic conditions, such as arthritis and atherosclerosis, occur more frequently in older

adults because of a variety of physiologic consequences of aging. Mortality rates tend to increase after the age of 40.

Because the occurrence of many health conditions is related to age, the most common adjustment for public health data is age adjustment. The age-adjustment process removes differences in the age composition of two or more populations to allow comparisons between these populations independent of their age structure.

The age-adjusted death rate is a summary measure that eliminates the effect of the underlying Age distribution of the population. The result is a figure that represents the theoretical risk of mortality for a population, if the population had an age distribution identical to that of a standard population. For example, a county's age-adjusted death rate is the weighted average of the age-specific death rates observed in that county, with the weights derived from the age distribution in an external population standard, such as the U.S. Population.

Age-adjustment then allows for the comparison of two distinct populations (for example, Hamilton County versus Florida) which most likely have differing age distributions. The age effects are in essence removed from the rates and the age-adjusted death rate then no longer reflects the actual death rate but is an indicator rate that can be used for relative comparisons.

In the past, the National Center for Health Statistics (NCHS) age-adjusted rates using the US 1940 standard population. Other agencies used the U.S. 1970 Standard. Beginning with 1999 data, federal agencies began age-adjusting to the U.S. 2000 Standard Million Population.

Zip Code level crude and age-adjusted rates are shown in a separate tables and the county rates and Florida rates are shown as well. These data should not be compared to tables that have only county and Florida rates in them. Population sources are different and these rates should not be compared.

### DENTAL/ORAL HEALTH

Hospitalizations and Emergency Department (ED) Visits are shown for dental/oral health reasons. ICD 9 Codes 520-529 were used to pull the emergency department visits and the discharges due to dental/oral health issues for data up to September 30, 2015. All possible fields were used in categorizing these visits. The following ICD 9 Codes were used to categorize dental/oral health as preventable for data up to September 30, 2015: 520.5, 520.6, 520.7, 521.0, 521.1-521.8, 522.0, 522.1, 522.4-522.8, 523.0-523.9, 524.3-524.6, 525.1, 525.3, 525.9, 526.4, 526.5, 528.0-528.3, 528.5-528.7, 528.9 and 529.0. For data from October 1, 2015 and forward ICD 10 Codes K00-K14 were used to pull off data for dental/oral health reasons. From the same time frame, ICD 10 codes K02, K03, K04, K05, K060, K061, K062, K08, K12, K13, M276, A690, and K098 were the preventable dental/oral health issues.

### EDUCATION LEVELS AND LANGUAGE SPOKEN AT HOME

The number of persons by level of school completed is shown as well as the language spoken in the home and how well English is spoken.

### EMERGENCY DEPARTMENT (ED) DATA

For tables with emergency department data please note that this data only includes emergency department visits in which emergency department registration occurs and the patient is not admitted for inpatient care at the reporting entity.

### ENVIRONMENTAL HEALTH

Various access to healthy food data is included in the report. Recreation and fitness facility data is also included.

### HEALTH PROFESSIONAL SHORTAGE AREAS (HPSA) DATA

HPSAs may be designated as having a shortage of primary medical care, dental or Mental Health Providers. They may be urban or rural areas, population groups or medical or other public facilities. Possible types of HPSA Designations in the area include.

Geographic Single County - Where the whole County is designated as HPSA.

Geographic Service Area - Where portions of a County, or portions of multiple counties, designated as a geographic HPSA.

Population Group - Where a Population within an area is designated as a HPSA.

Correctional Institutions - Federal and State prisons and youth detention facilities.

Comprehensive Health Centers - Entities receiving Section 330 funds to operate comprehensive health centers.

FQHC Look-a-Like - Federally Qualified Health centers certified as meeting 330 requirements but not receiving grant funds.

Rural Health Clinic - Certified as Rural Health Clinics by the Centers for Medicare And Medicaid Services.

HPSA Scores are developed for use by the National Health Service Corps in determining priorities for assignment of clinicians. Scores range from 1 to 25 for primary care And Mental Health, 1 to 26 for dental health. The higher the score, the greater the priority. All Federally Qualified Health Centers and those Rural Health Clinics that provide access to care regardless of one's ability to pay, receive automatic facility HPSA designation. These facilities may have a HPSA score of 0.

### HOUSEHOLD TYPES

There are various types of households. A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have a direct access from the outside of the

building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householders family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone. For more detailed explanation please see [http://www2.census.gov/programs-surveys/acs/tech\\_docs/subject\\_definitions/2014\\_ACSSubjectDefinitions.pdf](http://www2.census.gov/programs-surveys/acs/tech_docs/subject_definitions/2014_ACSSubjectDefinitions.pdf)

### IMMUNIZATIONS

The number of kindergartners and seventh graders that have been immunized are reported.

### INCOMES

Various income data is shown by zip codes and levels from the latest 5-year ACS estimates.

### INPATIENT HOSPITALIZATIONS

A general overview of discharges and patient days are shown by Zip Code level. Payor sources for these discharges are also shown for the county residents.

### LICENSED HEALTH CARE FACILITIES AND PHYSICIANS

Various types of health care facilities that are available in the areas are listed. Dentists and selected types of physicians are also listed.

### MEDICALLY UNDERSERVED AREAS & POPULATIONS (MUAS & MUPS) DATA

MUAs may be a whole county or a group of contiguous counties, a group of county or civil divisions or a group of urban census tracts in which residents have a shortage of personal health services. MUPs may include groups of persons who face economic, cultural or linguistic barriers to health care.

Possible types of MUAs & MUPs Designations in the area include.

C = Whole County

T = Census Tract

MUAs And MUPs score is the Index of Medical Underservice (IMU) score. The lowest score (highest need) is 0; And the highest score (lowest need) is 100.

Source. <http://bhpr.hrsa.gov/shortage/muadatadict.htm>

### MENTAL HEALTH

Hospitalizations and Emergency Department (ED) Visits are shown for mental health reasons. MSDRGs 876, 880-883, 885-887, 894-897 are used for hospitalizations. For data up to September 30, 2015, ICD 9 Codes 290-316.99 were used in determining mental health reasons to the emergency department after September 30, 2015 and forward, ICD 10 codes F00-F69 and F80-F99 were used to pull the mental health visits. Involuntary Exam Initiations (Baker Act) data is shown as well for the mental health section. Domestic Violence data is also shown.

### POVERTY

The U.S. Census Bureau provides poverty estimates through the Small Area Income and Poverty Estimates (SAIPE). Data shown is for all ages in poverty as well as children under age 18. To compare poverty at the Zip Code level, the ACS estimates are shown for various age groups and various levels of poverty.

### SMALL AREA HEALTH INSURANCE ESTIMATES

In previous Small Area Health Insurance Estimate (SAHIE) releases, uninsured was defined from the Annual Social And Economic Supplement to the Current Population Survey (CPS ASEC) and the question was for being covered "Some Time During the Past Calendar Year". With the 2008 release from the Census, the CPS ASEC data were replaced with American Community Survey (ACS) data. The ACS health insurance question asks, "Is this person CURRENTLY covered by [specifically stated] health insurance or health coverage plans?" In 2010, the age group 50-64 was added to the various age group breakouts in the SAHIE. The Census does not recommend comparing the 2008 and newer data to previous-year SAHIE estimates.

### UNEMPLOYMENT

The latest unemployment monthly and yearly rates are shown for the county. This data is from the Florida Research and Economic Database.

### ZCTAS AND ZIP CODES

The United States Census Bureau collects data by United States Postal Service (USPS) zip codes. Based on zip code data the Census Bureau then aggregates Zip Code Tabulation Area (ZCTAs) from addresses contained within each block. This allows the aggregated data to be converted into areal feature datasets (ZCTAs). For complete information, please see <http://www.census.gov/geo/reference/zctas.html>.

Below is a table that shows all zip codes in Bradford and Union Counties along with the city name, percent of the zip code addresses in the county, whether or not the zip code is a post office box or a unique zip code and whether or not the post office box or unique zip code is included with another zip code's information. As you can see in the table there are multiple zip codes from surrounding counties that cross into Bradford and Union Counties but are not shown because of the small percentage of addresses considered to be Bradford and Union Counties. Please see the table for a complete listing of those zip codes. Because zip codes can cross lines the tables include a Bradford and Union County number as well as a total for the zip codes in each respective county that is listed in the table.

## DRAFT BRADFORD AND UNION COUNTY TECHNICAL APPENDIX

Zip Code	Post Office Box	Percent of Zip Code in County	County Designation*
Bradford County Zip Codes			
32044 Hampton		95.4	Bradford
32042 Graham **	Yes	100	Bradford
32058 Lawtey		95.5	Bradford
32091 Starke		94.7	Bradford
32622 Brooker		81.7	Bradford
32054 Lake Butler		3.9	Union
32083 Raiford		4	Union
32656 Keystone Heights		16.1	Clay
32666 Melrose		17.8	Putnam
Union County			
32054 Lake Butler		96.1	Union
32026 Raiford ***	Yes	100	Union
32083 Raiford		96	Union
32697 Worthington Springs		100	Union
32058 Lawtey		3.9	Bradford

\* This is the main county that the zip code belongs with. If it is not one of the two counties (Bradford, Union) then information from those zip codes were not included in any of the tables.

\*\* 32042 Graham is included with 32044 Hampton.

\*\*\* 32026 Raiford is included with 32083 Raiford in some tables.
