SOURCES/NOTES

social vulnerability index

What is Social Vulnerability?

Every community must prepare for and respond to hazardous events, whether a natural disaster like a hurricane or disease outbreak, or a human-made event such as a harmful chemical spill. **A number of factors, including poverty, lack of access to transportation, and crowded housing may weaken a community's ability to prevent human suffering and financial loss in a disaster.** These factors are known as social vulnerability.

The **CDC/ATSDAR Social Vulnerability Index** helps emergency response planners and public health officials identify and map communities that will most likely need support before, during and after a hazardous event.
